Details of our Thermo Molecular

Details of our Teak

## Thermo Molecular

### A MOLECULAR WOOD PRODUCT

Stunningly beautiful, to fully appreciate Thermo Molecular, you have to know what it doesn't rot, expand, or contract; and, it has no chemicals or VOCs. Comparable to IPE, cypress, cumaruk, or teak, Thermo Molecular is hydrophobic, hypoallergenic, and exceptionally green.

## Teak

### A CHOICE THAT'S ALWAYS CHIC

Strong durable and naturally resistant to insects and termites, teak resists moisture, rot and decay. From its heavy weight and dimensional stability to its color and attractive straight-grain pattern, teak continues to be a luxurious choice worth every penny.

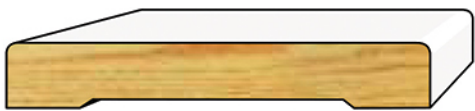

## Rose Pine

### EVERYTHING'S COMIN' UP ROSE PINE

Why do builders love Rose pine? Is a Hibryd between Eliotis pine and Taeda Pine wich create an incredible paint grade material. Clear Stain and paint-grade FAS quality material, enviromentally friendly, speaking green, it's our best value for money!

## Wood Floors

Hard and resistant a good option when decorating or building a home.

The wooden floors give warmth and elegance, besides protecting from the cold and maintaining a temperate climate inside the rooms; its composition, model, texture and colors allow satisfying different needs and pockets.

Spectacular Deck flooring in Teak and Thermo Molecular, excellent for exteriors and extreme climates.
